Facade & Architectural Design Series 68 Smooth & Texture

Super Durable Powder Coating QUALICOAT Class II | GSB Florida 3
Actual Powder Coated Samples

Smooth & Texture
smooth semi gloss | smooth matte fine texture matte
68

A quantum leap in color and gloss retention

The facade: face and protective mantle of a building. Esthetic. Technical. Functional. And resistant to sun, wind and weather. After all, the building envelope not only emphasizes the value of an object, but also protects it against environmental influences. Increasing UV exposure in all latitudes, climatic changes, and strict quality specifications according to GSB International or QUALICOAT make the coating on the facade the supreme discipline.

This is where TIGER comes into play. Our super durable powder coating TIGER Drylac® Series 68 guarantees architects and clients compliance with these quality standards and ensures that colors and effects shine even after many years. From Vienna to Singapore. From Frankfurt to New York.
