TIGER

The colours featured in this colour chart are matched as accurately as possible to colour standards. Some deviations from the standards might be noticeable due to texture and gloss level of the surface finish. Gloss level on metallic, fine and rough textured swatches cannot be accurately measured. Swatches have been matched to colour standards at a 45-degree visual angle under a D65 Daylight primary source. The swatches are to be considered as an indication only. In practice, discrepancy between the colour swatch and the actual powder coating may arise. This is due to paper and ink limitations, the influence of light and heat during the colour chart production, as well as gloss level, substrate, surface variations, binder systems and pigments, coating thickness and cure oven conditions used during application. For an accurate colour and finish assessment, it is recommended to obtain a powder coated sample panel from TIGER Drylac®.
